IL FUTURO È OGGI
THE FUTURE IS NOW

sviluppo sostenibile sustainable development

Prodotti riciclati e riciclabili Recycled and recyclable products

Grazie ad un ampliamento dei nostri impianti di riciclo meccanici possiamo aumentare la quantità di risorse già esistenti impiegate in diverse collezioni, per ridurre l'impatto ambientale; molti dei nostri prodotti sono ottenuti da una % di materiale rigenerato. Nell'ambito di un'economia circolare la plastica è la protagonista principale di un riutilizzo continuo e l'impiego proficuo di risorse post-industrial e post-consumo è il modo migliore per muoversi verso la sostenibilità ambientale.

A queste scelte Stefanplast dà una forma con ampie soluzioni di articoli indoor/outdoor dove al trend innovativo della linea Opera si unisce ETHICA, una nuova collezione di vasi, balconette e fioriere di design, elegante nella finitura e nei colori e interamente realizzata in materiale riciclato.

Thanks to an enlargement of our mechanical recycling plants we can improve the quantity of existing resources used in various collections, in order to further reduce the environmental impact; many of our products are obtained from a % of already regenerated material. In the circular economy context plastic is the main protagonist of a continuous reuse and the profitable application of post-industrial and post-consumer resources is the best way to move towards environmental sustainability.

The innovative trend of the Opera Line is now joined by ETHICA, a new collection of pots, balconies and flowers boxes fully made of recycled material, with a refined design and elegant finish and colours for an absolutely unique proposal.
